

DoR & DoD

Definition of Ready (DoR)

A User Story is considered Ready to enter a Sprint when:

- The business objective is clearly defined.
- The User Story follows the format:
"As a..., I want..., So that..."
- Acceptance Criteria are defined.
- Dependencies have been identified.
- Story Points have been assigned.
- Required financial data and indicators are available.
- Educational content requirements have been defined when applicable.
- The Product Owner has reviewed and approved the story.
- The development team understands the scope and requirements.

Definition of Done (DoD)

A User Story is considered Done when:

- All Acceptance Criteria have been successfully met.
- The feature has been implemented and tested.
- No critical defects remain open.
- The Product Owner has reviewed and approved the feature.
- Documentation has been updated when necessary.
- Educational content has been reviewed and approved by the Financial Analyst when applicable.
- PDF exports are generated correctly and contain all required information when applicable.

Non-Functional Requirements

- Pages must load in less than 3 seconds.
- The platform must be responsive on desktop and mobile devices.
- User authentication data must be securely stored.
- Financial information displayed must be accurate and consistent with the data source.

- System availability must be at least 99%.
