

THE PRODUCT VISION

For:

Individual investors and Financial analysts

whose:

Have difficulty quickly assessing the financial health and investment potential of publicly traded companies

the:

StockWise

is a:

Web-based stock fundamental analysis platform

that:

Automates financial analysis, calculates key indicators, and provides a standardized company score

Different from:

Financial websites that only display raw data and require manual interpretation

our product:

Transforms financial experts' methodologies into automated analyses, helping investors make informed decisions faster and with greater confidence
